

CLAIMS

What I claim as my invention is:

1. A novel method and system of reselling in retail, preferred Internet
5 access services to the end user consisting of:
Node 1 – ISP Super Market consisting of M1
Node 2 – Subscriber end consisting of M2
Node 3 – Preferred ISP Server consisting of M3
- 10 2. The method of claim 1 wherein node 2 is any client machine with
Internet connectivity and Web browsing capability.
3. The method of claim 1 wherein node 2 carries a Web application
which when accessed by node 1, provides choice of ISP that node 1
15 subscriber wishes to subscribe.
4. The method of claim 1 wherein node 3 is ISP server which
authenticates the node 1 subscriber routed through node 2 reseller Web
application.
20
5. The method of claim 1 wherein node 1 subscriber downloads ISP
connectivity software from node 2 Web application server.
6. The method of claim 1 wherein subscriber of node 1 connects to
25 the node 3 preferred ISP, by means of ad display interface at a subsidized
cost.
